

ISETH 2015

International Conference on Science, Technology, and Humanity

<http://iseth.ums.ac.id>

INNOVATIONS FOR SUSTAINABLE DEVELOPMENT

Solo City | Indonesia
7-8 Dec 2015

CALL FOR PAPERS

Science claims that its ultimate goal is to explain "the mysteries" of nature or natural phenomena. By giving high value on reason, experience, and evidence, it has gained its own authority independent from other external institutions. The constant philosophical question then is whether science should acknowledge any authority other than itself. There was a time when science demanded greater freedoms to compete with the political and religious powers through its creed of science for the sake of science. It stood against any power potential to intervene its authority in explaining nature.

Technology, which represents the application of science, aims at helping human beings overcome their problems and making life easier, more efficient and more enjoyable. The humanity crisis resulted from the world wars, however, clearly showed that the creed of science for science's sake, particularly with its mass destruction technology, is devoid of meaning and even against the nature of humanity. The wider community, as the tax-paying citizens, funding various research projects deserves the priority of concerns. Science and technology, therefore, need to have moral bases that contribute to humanity and the larger ecosystem.

The concerns in the morally aware development of science and ecologically friendly technology require committed partnership between scientists, business people, politicians, religious leaders and educators in order to make the world a better place. The current conference, therefore, aims at accommodating the concerns of various parties having different interests to contribute the efforts for living livable life.

TOPICS

Topics may cover the following fields of study :

Physical Sciences and Engineering

- Engineering
- Computer Science
- Mathematics
- Physics and Astronomy

Life Sciences

- Agricultural and Biological Sciences
- Biochemistry and Molecular Biology
- Environmental Science
- Microbiology and Neuroscience

Health Sciences

- Medicine and Dentistry
- Nursing and Health Professions
- Pharmacology, Toxicology and Pharmaceutical Science
- Veterinary Science and Veterinary Medicine

Social Sciences and Humanities

- Arts and Humanities
- Management, Finance and Economics
- Psychology
- Social Sciences

IMPORTANT DATES

Nov 1st	Full paper deadline
Nov 12th	Notification of accepted paper
Nov 16th	Early bird registration
Nov 23th	Deadline of conference registration and camera ready (final paper) submission
Dec 7-8th	International conference date
Dec 8th	Tour to Solo heritage sites

REGISTRATION

Type	Early Bird	Regular
Regular Presenter	IDR 1,500,000	IDR 2,000,000
	USD 150	USD 200
Student Presenter	IDR 750,000	IDR 1,000,000
	USD 75	USD 100
General Participant	IDR 600,000	IDR 750,000
	USD 60	USD 75

PUBLICATION

Selected papers will be published in various UMS Journals, some journals are already accredited by DIKTI (Directorate General of Higher Education).

CONTACT

KEYNOTE SPEAKERS

Prof. Mustafa bin Mat Daris
Professor
in Computer Science
and Information Technology
UMSIH Malaysia

Prof. Teruhiko Kido
Professor
in Community
and Environmental Health
Kanazawa University - Japan

Assoc. Prof. Laurence Tamatea
Associate Professor
in Pedagogy and Learning
Charles Darwin University - Australia

Venue
**ISETH
2015**

Auditorium Moh. Djazman
Universitas Muhammadiyah Surakarta
Solo City, Indonesia
